PROFESSIONAL SUMMARY

AI-Assisted Full Stack Product Engineer with **3.5 years of experience** building scalable SaaS applications, enterprise software, and customer-centric digital products using **Java, Spring Boot, React, Node.js, Express, and MongoDB**.

Transform business ideas into production-ready software by combining **product thinking, system design, modern UI/UX, and end-to-end full stack engineering**. Leverage **OpenAI Codex, ChatGPT, Claude, and AI-assisted development workflows** to accelerate delivery while maintaining high standards of architecture, code quality, and maintainability.

TECHNICAL EXPERTISE

Languages: Java, JavaScript (ES6+), SQL

Frontend: React, HTML5, CSS3, Tailwind CSS

Backend: Spring Boot, Node.js, Express, REST APIs

Database: MongoDB, MySQL

Cloud & DevOps: Azure, Jenkins, Git, CI/CD, Docker (Basic)

Testing: Selenium, API Testing, Automation Testing, Regression Testing

Tools: Git, GitHub, Postman, Jenkins, JIRA, VS Code, IntelliJ IDEA

AI Development: OpenAI Codex, ChatGPT, Claude, Prompt Engineering

Product Design: UX, Workflow Design, SaaS Products

Architecture: REST APIs, Modular Backend Design, SaaS Architecture

PROFESSIONAL EXPERIENCE

Software Engineer (Full Stack Development & Quality Engineering)

Oct 2022 – April 2026

Accenture India

Mumbai, India

- Developed enterprise backend services using Java Spring Boot
- Worked on automation and quality engineering for enterprise applications
- Integrated Jira REST APIs and third-party enterprise systems
- Collaborated with cross-functional Agile teams
- Optimized application performance through debugging and root cause analysis

FEATURED PRODUCTS

1. Nexus - Real Estate & Finance ERP

Designed to replace spreadsheets and fragmented tools by providing a centralized platform for managing properties, cash flow, expenses, investments, and business insights.

Product Highlights:

- Property portfolio management
- Cash flow & expense tracking
- Financial analytics dashboard
- Business reporting
- Secure authentication

Tech: React • Node.js • Express • MongoDB

2. ULOOMY - Gamified Online Learning Platform

Designed and developed an engaging education platform focused on delivering an interactive, gamified learning experience. The platform transforms traditional online education through intuitive learning flows, structured progress tracking, achievements, and an enjoyable user experience.

Product Highlights:

- Gamified learning
- Course management
- Progress tracking
- Interactive lessons
- Admin dashboard

Tech: React • Node.js • Express • MongoDB

3. Maheque - Premium Perfume Brand Website

Live Website: maheque.com

Luxury perfume e-commerce website built for my own fragrance brand with a focus on premium branding, responsive design, performance optimization, and customer experience.

Tech: React • Node.js • Express • MongoDB

4. Student Management System - Commercial Student Management Platform

Commercial web application for educational institutes supporting student lifecycle management, attendance, examinations, report cards, and administrative workflows.

Tech: React • Node.js • Express • MongoDB

ENGINEERING PHILOSOPHY

- Product-first engineering mindset with strong focus on usability and business workflows.
- Design scalable systems with emphasis on clean architecture and maintainability.
- Leverage AI-assisted development (Codex, ChatGPT, Claude) to accelerate delivery while maintaining engineering quality.

EDUCATION

Master of Computer Application (**MCA**) - North Maharashtra University - Jalgaon - **2024**

Bachelor of Computer Application (**BCA**) - North Maharashtra University - Jalgaon - **2022**
